

ECOSmartPack®

The **ECO-Environmental** technologies of Uteco Group for **Converting**

Eco
Innovation in
Converting

Consistent innovation.

WATER BASED INKS

- Superior printing quality without compromising the running speed
- Suitable for all kinds of plastic substrates
- Zero costs in VOCs abatement equipment

UV INKS

- Flexo printing quality equal to rotogravure
- 100% of ink utilisation, no need of washing at the end of shift
- Conformity to legislation for food packaging

WET FLEX EB INKS

- Reduced costs of production (Energy Saving)
- Conformity to legislation for food packaging

WATER BASED & SOLVENT-LESS ADHESIVES

- Minimum costs of investment & cost of production (solvent-less)
- Zero costs in VOCs abatement equipment
- Conformity to legislation for food packaging

WASTE REDUCTION

- Uteco Gearless Direct-Drive Technology
- Quick change between jobs (sleeves, SprintWash®, UFDMM, PCT®)
- Continuous control & monitoring of job parameters during running

ENERGY SAVING

- UTECO EXCELLENCE (know-how, patents, R&D, innovations)
- UTECOSmartPack®: Engineering Platform for improved performance and profitability
- New generation of motors & drives

And a new innovation is coming...

GENETIC INNOVATION
