gmg & Epson!

Produce film-based package proofs in-house with the new Epson Stylus® Pro WT7900 — the world's first water-based inkjet package proofer with white ink. This highly accurate printer is ideal for professionals who want a cost-effective alternative to conventional proofing systems with

white ink that can be both expensive and time-consuming. Boasting supreme ease-of-use and low maintenance, the Epson Stylus Pro WT7900 streamlines proofing workflow by allowing you to print directly to film without the need for costly devices or specialized skills.
